You are sure to love the way your lawn looks!

GREENVIEW[®]

Fairway Formula

Lawn Fertilizer

Toughens, greens and thickens
without excess growth

Extended time-release
feeding of nitrogen lasts up to 12 weeks

Apply any time turf is actively growing

PROMOTES

- Deeper Green Turf
- Faster Green-Up
- Brilliant Color Response
- Fewer Clippings
- Extended Color for up to **12 weeks**

Covers up to 10,000 sq. ft.

27-0-5

Net Weight 33 lbs. (14.96 kg.)

3/5 of the Nitrogen is Slow Release

FERTILIZE LIKE THE PROS - IN JUST TWO EASY STEPS!*

Lawn care professionals know that a key factor in cultivating a world-class lawn is applying the right fertilizer at the right time. The beautiful thing about GreenView Fairway Formula fertilizers is that you only need two applications per year. That's where the simplicity and savings come in, compared to traditional lawn care options requiring twice as many applications. The GreenView Fairway Formula 2-Step application program caters especially to the cool-season grasses, which experience active root and shoot growth during the spring and fall.

GreenView Fairway Formula Lawn Fertilizer has lawn nutrients for your lawn to help it develop more robust roots, consistent even growth, and a lush, green color. This fertilizer formulation is ideal if you do not have weed or crabgrass control problems, but want to provide slow-release nutrients to your lawn which will keep it healthier and green up to 12 weeks.

**Just two steps - just that easy!
Save time AND money!**

How can any fertilizer that works so quickly, last so long and work so well?

The answer is the patented combination of ammonium sulfate with methylene urea featured in GreenView Fairway Formula fertilizers. It's a smarter alternative to coated nitrogen products because it retains its slow-release attributes even when cracked, chipped or crushed to provide exceptional performance.

While a spring application is common - you can apply GreenView Fairway Formula Lawn Fertilizer with confidence **any time** your turf is actively growing*.

USE INSTRUCTIONS

*In areas where nitrogen applications are restricted, check with your local county extension agency for seasonal application restrictions prior to repeat fertilizer application.

For Established Lawns:

For best results, make a single application in Spring as part of the GreenView Fairway Formula 2-Step application program.*

GreenView Fairway Formula Lawn Fertilizer can be applied any time grass is growing. Do not apply to frozen turf.

For New Lawns:

Apply the fertilizer over the soil and rake into the top inch of soil before seeding or sodding. Water regularly until germination to keep the seed bed moist. Do not use weed control until grass is established.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.

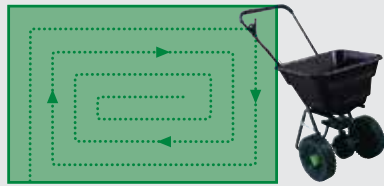

Do not hand spread. Store unused fertilizer safely.

**CAUTION:
KEEP OUT OF REACH OF CHILDREN.**

SUGGESTED SPREADER SETTINGS

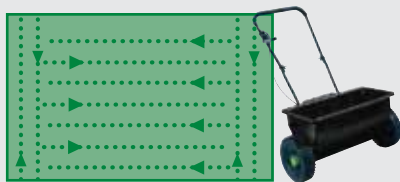

Broadcast Spreader Settings:

Apply in a single pass by starting on the outside border and apply in a circular path working toward the center as shown in diagram.

Drop Spreader Settings:

First make two passes along the top of the area you'll be covering. Then make two passes along the bottom of the area. Then move back and forth along the long part of the lawn. Overlap the coverage slightly and on each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped. See diagram provided.

Follow directions to avoid over fertilizing which may harm your lawn. The spreader settings provided are approximate. Suggested settings were calibrated and field tested. However, age and condition of spreader, speed of operation and evenness of terrain may require slightly different settings for desired coverage.
