GRASS SEED

Long live your lawn®

Since 1947, we have been dedicated to helping you create a personal outdoor oasis for yourself and your family. Our pure grass seed blends and high-performance fertilizers are designed to transform your lawn into a beautiful, durable landscape you will enjoy spending time in. Our expertise in lawn care science ensures you will be equipped with high-quality products **guaranteed to work.**

DIRECTIONS FOR SUCCESSFUL SEEDING

1. PREPARE THE SOIL

A. New Lawns & Patch Repair

- Loosen the top 2 to 3 inches of soil
- Remove debris – sticks, stones, etc.
- Break up dirt clumps larger than a quarter
- Level areas where excess water might collect

B. Overseeding Existing Lawns

- Mow grass as short as possible
- Loosen top 1/4 inch of soil in bare spots
- Remove debris and dead grass
- Level areas where excess water collects

TIP: Use existing topsoil, as added soil may contain weed seeds. Remove any existing weeds and their roots before planting. Use a weed killer, if necessary, and allow sufficient time for it to dissipate before seeding.

2. PLANT SEEDS

- Spread seed evenly by hand in small areas
- Use hand or lawn spreader in large areas

Note: Not for use in livestock grazing areas.

TIP: Too many seeds too close together causes seedlings to fight for room and nutrients. Grass may be weak or thin in these areas. For spreader settings, please scan the QR code, call 800-233-1067 or visit www.GreenviewFertilizer.com.

3. COVER SEEDED AREAS

Protecting newly seeded areas is one of the most important steps for seeding success when growing grass.

- Lightly rake seed bed so no more than 1/4 inch of soil covers grass seed

For best results, we recommend protecting the seeded area with GreenView® Grass Seed Starter. The tackifier and starter fertilizer in our biodegradable Grass Seed Starter pellets is designed to protect and nourish the development of strong roots, while holding on to moisture, to promote thick and healthy new grass growth.

4. WATER OFTEN

- Keep seed bed moist to enhance germination
- Water lightly (don't saturate) and frequently (at least once daily) until new grass is two inches tall
- Water new grass regularly to keep roots moist

5. MAINTENANCE

Mowing

- Mow only after **new** grass reaches three inches tall
- Cut and maintain at **3 inch** height
- Keep mower blades sharp to avoid tearing

Weeding

- Wait to use a weed control product until grass is established

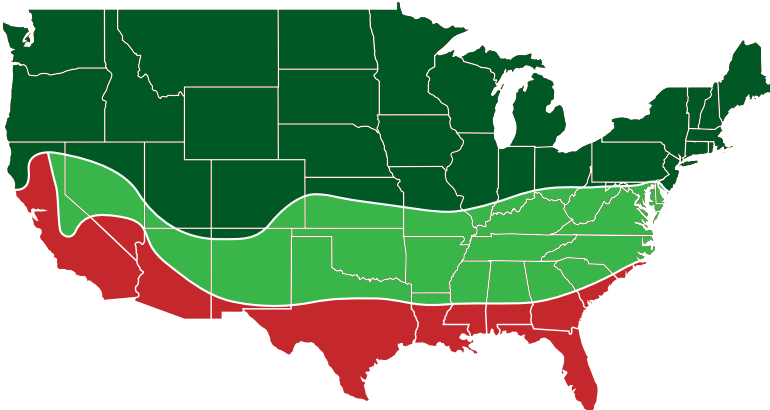

Greening

- Use GreenView® Grass Seed Starter or Starter Fertilizer while new grass is establishing
- Continue feeding with GreenView® Spring or Fall Fertilizers to maintain turf density and appearance

PURE SEED VS. COATED SEED

Pure seed = more coverage per pound than coated seed. All-in-one seeding products or coated seeds of the same bag weight do not contain as much actual grass seed, so you will get less square foot coverage. When choosing between grass seed options, be sure to compare price on a square foot basis.

WHERE TO PLANT

RECOMMENDED TRANSITION ZONE NOT RECOMMENDED

ABOUT COOL SEASON GRASS:

While they might go dormant during the hottest summer months or the coldest winter periods, this dormancy does not mean the grass is dead. It is a natural survival mechanism that helps the grass conserve energy and water, allowing it to bounce back vibrant and green when favorable conditions return. With deep root systems and excellent resilience, cool season grasses provide a lush, durable lawn year-round, despite seasonal dormancy.

DID YOU KNOW?

As with all grass seed, new grass sprouts can grow at an accelerated rate and may look different in color and texture until they become established. Allow time for establishment to enjoy your lush cohesive lawn.

GUARANTEE:

GreenView® guarantees the germination of this grass seed, when used as directed. Please visit www.GreenviewFertilizer.com for more info.

Warning: To avoid danger of suffocation, keep this bag away from babies and children. Do not use this bag in cribs, beds, carriages, or playpens. This bag is not a toy.

NOTICE TO CONSUMER: The seed laws of several states including Arkansas, California, Florida, Georgia, Indiana, Mississippi, North Dakota, South Dakota, South Carolina, Texas, and Washington require arbitration or conciliation of disputes involving the quality or performance of seed before litigation. A complaint (sworn for AR, FL, IN, MS, SC, TX, WA; signed only in CA, GA, ND, SD) must be filed with the Commissioner/Director/Secretary of Agriculture, Seed Commissioner, or Chief Agricultural Officer within such time as to permit inspection of the seed, crops, or plants by the designated agency and the seller of the seed. A copy of the complaint must be sent to the Seller by registered mail.
